SharperVisitorLogs®

Keep a healthy log of your premises' visitors

Visitor Management is a Serious Challenge

Who visited one of our employees at 12:30pm on Sunday?

Which visitor badge number did s/he use?

How long did s/he stay within the building?

Was s/he behind the incident that happened on Floor 7?

What is her/his name, nationality and age?

When is the peak time of our visitors?

You have many more questions waiting in vain for answers.

The Solution is Here

1. Visitors can present credentials, such as: **Smart Civil ID**, **Passport** and **Driver's License**.

2. Efficiently capture visitor data <u>without causing delays</u> at the gates and log them in a book.

3. Assign a **Visitor Badge** to the visitor.

4. When a visitor leaves, log the visitor <u>out</u>.

5. Generate comprehensive reports.
